Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 21, 22, and 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by **Chanasyk et al (5,345,061)**. **Chanasyk et al** discloses a system for heating a printed circuit board and includes a support (12), a heater (50, 51), an air supply (valves 60, 62), a first (of multiple) hollow elongated tube (unnumbered, but SEE elements 58, 56, 70, 66) all having multiple openings where gas is directed through the holes, past the heater, and toward the circuit board (SEE column 6, lines 13-21).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over **Chanasyk et al (5,345,061)**. **Chanasyk et al** discloses the applicants' primary inventive concept, but does not particularly disclose the material of the elongated tube being made of black

anodized aluminum. It would have been an obvious matter of design choice to modify the elongated tube by having a material of black anodized aluminum, since the applicant has not disclosed that having a black anodized aluminum tube solves any stated problem or is for any particular purpose and it appears that any material that would be exposed to the operating environment of processing printed circuit board would perform equally well with **Chanasyk et al.**

Allowable Subject Matter

Claims 27-34 are allowed.

Claims 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 17, 21, and 22 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's arguments filed 7/16/03 have been fully considered but they are not persuasive. In response to applicants' remarks that Chanasyk et al does not discuss a first hollow elongated tube mounted so that a heater is between the first tube and a circuit board, the examiner respectfully disagrees and directs the applicants' attention to Figures 2-4 which teach, at elements (58, 56, 66, 70) multiple elongated tubes in a position such that the heater 51 is between the elongated tube and the article to be

Art Unit: 3749

treated, furthermore each heater (50, 51) is designated to heat one side of the conveyed article; this clearly reads on the proposed claimed invention.
